Range Servant

– Established in 1983

Range Servant was founded in 1983, in Halmstad by Jordan Knez. He took his golfing enthusiasm and combined it with his technical knowledge from the packaging industry. The result was the first Range Servant Ball Dispenser and since then he has developed many high quality golf range products.

After more than twentyfive years in business Range Servant has obtained recognition for its high quality products with strong reliability and excellent customer service through experience and technical knowledge. Range Servant missions statement states: "The bond we have with our customers is deeply important to us. We continuously work to drive our design and product development engine, so that we always can meet our customers needs. With help from our customers we receive valuable feedback from testing our new products, so that we can ensure that we only deliver products with the highest possible quality and reliability. Construction materials and assembly components are tested thoroughly. Our goal is always to deliver a product that is not only innovative, but ingeniously simple and ready to perform at highest level."

With long experience in the golf industry, Range Servant has successfully expanded its market shares and is today the leading supplier of high quality ball management systems. In 1991 Range Servant opened a subsidiary company in North America and is also represented by distributors all over the world. A subsidiary office is also located in Great Britain. Range Servant is an active participant in the golf community and member of several industry organizations.

PUT THE GOLF BALL IN PLACE

It is at the driving range the foundation for success is laid. Rational training combined with professional support leads to better golfers. A good golf driving range offers the best preconditions for all golfers, both during the training session and as a warm-up for that regular game with friends. To quickly receive a basket of good clean range balls, take a few steps to the range mat or walk up to an automatic Tee-Up and start swinging the golf club, that is the way a good driving range should work. When golfers, through efficient training achieves success, the interest increases and more golfers will find their way to the driving range to improve their game, which leads to a higher turn-over for you as a driving range operator.

Develop an efficient golf range with Range Servant

With our Ball Management System concept, every range operator is able to develop a cost efficient and easy-to-operate driving range. Through automation of the driving range and through sophisticated IT-Solutions a Ball Management System releases both time and resources to improve core business and customer relations.

Comprehending the specific requirements for designing and operating a golf range, we are able to customize our Ball Management System to suit both the small country club and the large commercial range. We provide solutions that improve your range operations today and prepare you for the future. We have developed four technologies to help create an efficient Ball Management System for your range:

- Ditch System
- Blower System
- Multi-Storey
- IT-Solutions

Ball Management System

Ditch System

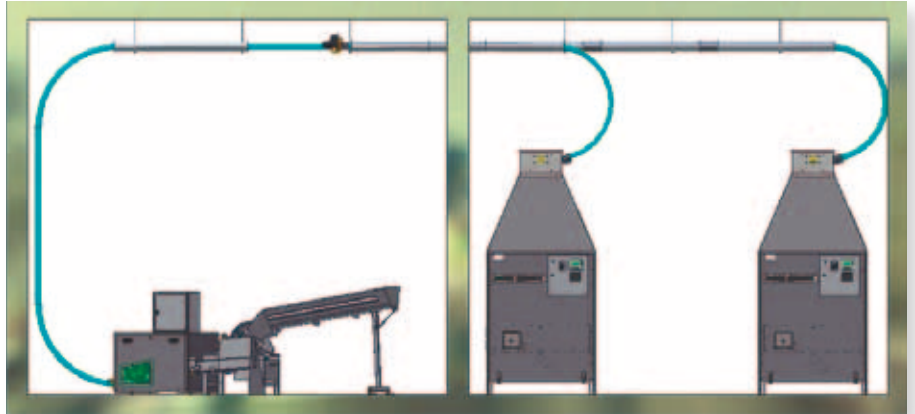

Our ball ditch system eliminates the manual lifting of balls into a washer. Using our unique MOP drive unit and ball picker with hydraulic baskets, balls are emptied in the ball ditch at the touch of a button. Filled with water, the ball ditch acts as a soaker tank, holding approximately 5 000 balls. The ball ditch is a time saver, allowing your staff to continue picking balls while the ditch system washes and transports the balls to the dispensers.

Blower System

A blower system makes it possible to feed balls to dispensers in the center of the tee-line from a remote washing area or as a ball distributor feeding balls to multiple dispensers from a central storage area. Using a blower system allows safe and easy access for the range staff and enables easier design of the range area.

The blower system uses compressed air to move the balls in flexible hoses, and can easily be installed both at single and multi-storey ranges.

Multi-Storey

One of our technologies is our multi-storey elevator, which is able to load multiple dispensers on multi-storey ranges. We are able to custom make elevators to suit your building. In Hong Kong, in 2005, we installed fully automated system with a 12 meter tall elevator, which feeds four dispensers on four floors with range balls.

IT-Solutions

Our Ball Management System concept is not just about “moving balls”, but also to provide retail information to all parts of the range business such as the pro-shop, bar or restaurant through IT-solutions. View how your range is operating in real-time sitting anywhere!

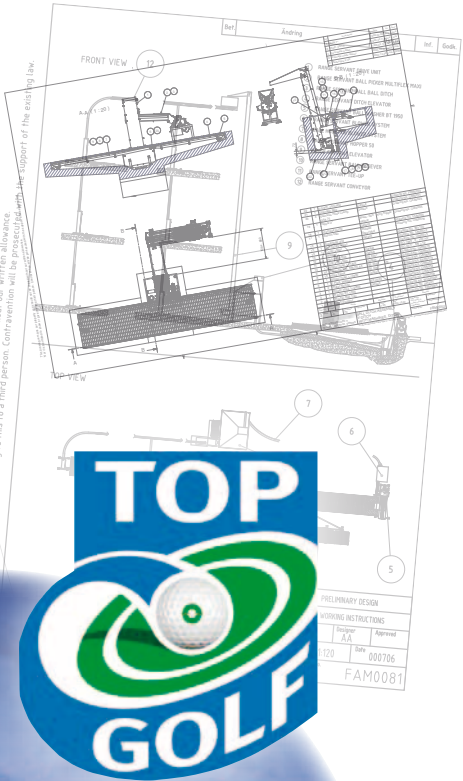

Extended storage capacity with up to 50 000 balls.

Project Management

To ensure the highest performance and reliability of our ball management systems, we work according to our project model, which runs through our entire working process from quotation, design, production to the completed installation. Each project step has to pass through a grid criteria and be approved prior to proceeding to the next step in the project. Using this method we ensure that our customers are involved in each step and receives a system that fulfills their requirements.

Our relationship with the customer do not end at the point of installation, though. A one-year warranty check up is included with all our systems together with a one year contract to our support line.

TOP GOLF – A PARTNERSHIP IN TECHNOLOGY

Range Servant is a Top Golf partner providing complete Ball Management System to Top Golf sites around the world.

The Top Golf game centres use custom-made Range Servant Ultima ball dispensers to read and register the Top Golf's ID Golf Ball to the playing customer. The ID BALL feeds back the exact distance and points when it lands in a Top Golf Target.

The balls are extracted from the Top Golf targets using a Range Servant's mobile blower system to the back of a buggy cart.

"We have worked closely with Range Servant in developing solutions to deliver the TopGolf experience. Micro-chipped golf balls and unique I.D. Ball System technology give distance feedback and a score in points to deliver a fast, fun and competitive experience using real clubs and balls. Innovation is the focus of our brand and we have found Range Servant keen to work with us to develop innovative solutions to our needs".

Peter Allport, Chief Executive Officer, GEI Ltd.

RS Ball Dispenser Flat Top Models

RS-4, RS-8, RS-11

The flagship product of Range Servant is the original RS Ball Dispenser, which has proven to be the most reliable and durable in the market. The grid and cradle system, introduced in 1983, consistently delivers an exact amount of clean, counted and undamaged balls to the customer.

- 3 bucket sizes available
- Exact ball count per dispense
- Tokens, cash, cards, keys
- Stainless aluminium, galvanized
- Easy and safe to load

Since all Range Servant dispensers are modular by design, they can be expanded and upgraded to larger models or into cone top models, to meet the needs of a growing driving range. For example, an RS-8 can be expanded to an RS-12!

Strongly made and simple to maintain, all essential working parts are made in rust resistant galvanized steel and aluminium. An ingenious "grid and cradle" design sorts out damaged balls and other unwanted objects ensuring that the golfer only receives clean and undamaged balls.

RS: FLAT TOP

150 010	RS-4	with internal wash	~ 5 200 balls	1010x550x1476 mm
180 000	RS-8	with internal wash	~ 8 000 balls	1010x760x1476 mm
110 007	RS-11	with internal wash	~ 11 000 balls	1250x1010x1476 mm

Ultima Ball Dispenser Flat Top Models

Ultima 8, Ultima 15, Ultima 16 Dual

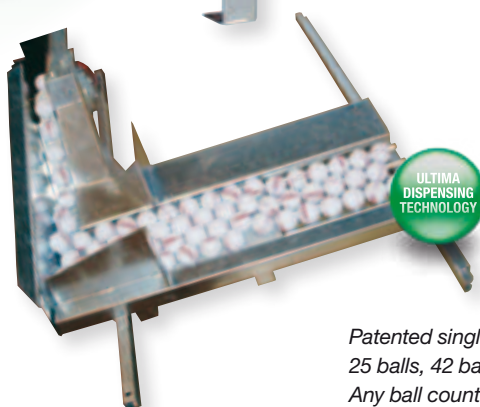

Featuring a “single ball” dispensing mechanism that counts the balls individually, you can count on the Ultima to dispense the right amount of balls every time! Combine this with superior electronic controls and the widest selection of payment methods and you have the most flexible and reliable ball dispenser today.

- 3 bucket sizes of any ball count
- Ball count changes easily made
- Photo-sensor counts each ball
- Tokens, cash, cards and keys
- Stainless galvanized aluminium
- Easy and safe to load

All Range Servant Flat Top machines can be loaded from the front or back. Ball counts can be changed at any time by simply turning a dial. Since our ball dispensers are modular, they can be expanded and upgraded to larger models, or into cone top models to meet the need of a growing driving range. For example, an Ultima 8 can be expanded to an Ultima 12!

Range Servant Ball Dispensers will increase ball sales, give you better cash control and reduce labour.

*Patented single ball dispensing:
25 balls, 42 balls, 75 balls, 104 balls...
Any ball count is possible with
the Ultima dispenser.*

DTA 0000	Ultima 16 Dual	~ 16 000 balls	2022x760x1330 mm

Ultima Cone Top Models

Ultima 12, Ultima 19, Ultima 20 Dual, Ultima 45 Dual

HIGH-VOLUME RANGE?

If you think your range is busy, then look no further! The high volume cone-top models are designed to minimize labour and increase revenue at the same time. These models are extremely versatile and designed to be loaded with any of our renowned automation products. Whether filled by our elevator or blower, our Ball Management Systems are quiet, cost effective and space efficient.

Cone Top models are available in a single or dual outlet design. With capacities ranging from 12 000 to 43 000 our dispensers can meet the demand of any golf range.

Range Servant dual dispensers have proven their mettle at the busiest ranges in the world. With extra capacity and twice the reliability, our dual outlet dispensers will allow you peace of mind.

Quiet, cost effective and space efficient. Our dual outlet cone top models are available in two sizes: 20 000 and 43 000 ball capacity.

These dispensers should be used as a complete Ball Management System together with elevator/blower and ball washer.

ULTIMA: CONE TOP

DLM 0000	Ultima 12	~ 12 000 balls	1012x760x2056 mm

Ultima Combi and Green Line Dispensers

GL6, GL8 and GL10

ULTIMA COMBI

The ALL-IN-ONE Ball Dispenser with internal washer and ball elevator.

The Ultima Combi is space efficient and cost effective. This dispenser holds a capacity of 14 000 balls, which makes it the perfect fit for smaller stand alone or club ranges. The internal ball washer and elevator reduce labour to a single step and it is designed to be easily accessed and maintained.

Just like Range Servant's other user friendly ball dispensers the Ultima Combi gives the paying customer the exact amount golf balls, quickly and quietly. The dispensing cycle is easy on your ball inventory. Any payment system can be used and the amount of balls per payment is easily changed.

GREEN LINE DISPENSERS

With the same durable and reliable dispensing mechanism, Range Servant also offers the Green Line – a powder-coated aluminium ball dispenser with an attractive green housing.

The Green Line dispensers are designed to fit smaller driving ranges and country clubs with a lower ball demand. With its' green aesthetics it looks right at home on the golf course.

ULTIMA COMBI AND GREEN LINE

GBM 0000	Ultima Combi	~ 14 000 balls	1010x1010x2165 mm
GLD 0000	GL 6	~ 5 700 balls	550x1012x1476 mm

GLD 0002	GL 10	~ 10 000 balls	760x1260x1476 mm

New 2010! RS Tee-Up

TEE-UP YOUR CUSTOMERS AND YOUR BALL SALES WITH RANGE SERVANT'S NEXT GENERATION TEE-UPS

The RS Tee-Up with feeder is a unique product that will, at once, increase ball sales while enhancing the customer's golfing experience. Proven to speed up play by 25-50%, golfers benefit from hitting ball after ball without re-gripping or bending down to tee up the next ball, while range owners will notice the increased speed in which golfers finish their buckets. Its ergonomic design allows the golfer to quickly and easily adjust the tee to the perfect height by holding the club over the Up or Down Sensor.

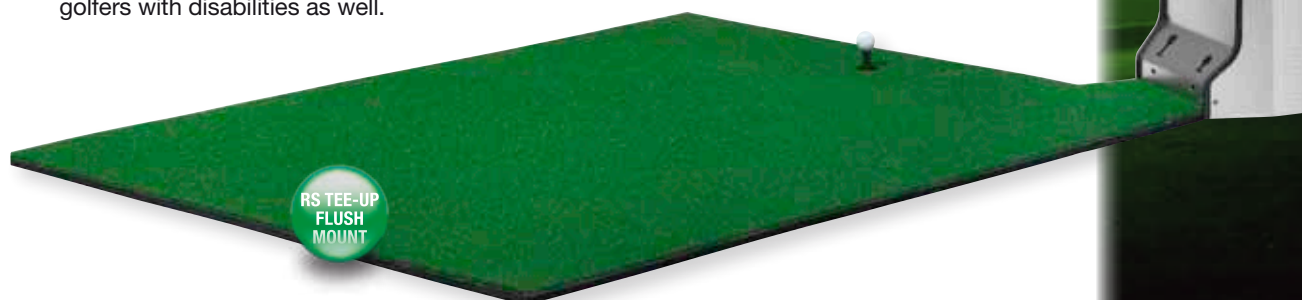

THE RS TEE-UP

Easy to install, our RS Tee-Up can be placed right on your existing tee-line. It comes standard with the 100 ball capacity feeder hopper and requires only a standard power outlet.

The user friendly Display Screen accurately shows the Tee-Height and also keeps a tally of balls hit.

THE RS TEE-UP FLUSH MOUNT

In addition to offering all of the standard features, our Flush Mount System can be customized to fit right into your existing tee-line or new range project. The tee-up's mechanics are underneath the platform with the stance mat area laying flush to the tee-line surface. This creates a golf-friendly platform not only for the serious and recreational golfer, but for senior citizens and golfers with disabilities as well.

RS TEE-UP

TJM 02000	Tee-Up with feeder, semi-automatic	~ 100 balls	1640x2222x1000 mm
TMM 0029	Tee-Up with feeder, semi-automatic, flush mount	~ 100 balls	customized area

Ball Picker Light

Range Servant Light pickers are built stronger than any picker in their class. We use only thick gauge aluminium and galvanised steel to ensure that our pickers will stand up to busy ranges and tough terrain. Range Servant pickers have the highest capacities in the market. Our 3 gang pickers hold more than most 5 gang pickers. The Light Picker is available in 2, 3, 4, 5, and 6 gang configurations.

The hybrid design sets the picker gangs in a straight beam configuration. The modified front beam wheel extension, however, reduces the swing weight of the picker when it's attached by our A-Frame to a utility cart.

Both the flat aluminium cross beam and the front beam wheel extension allow for a terrain flexible ride.

- Fully rust-resistant aluminium and steel
- In-line design allows for backing
- Light weight flexible design
- No failure-prone elbow fittings
- Flotation tyres for smooth stable ride
- Multiple flex-points for varied terrain
- Adaptable to any cart or vehicle
- Unique Multiflex discs

Ball Picker Light is dedicated to be operated with power driven vehicles. One basket hold 400 balls which gives the Light picker a capacity ranging from 1 600 to 4 800 balls. The A-frame is included.

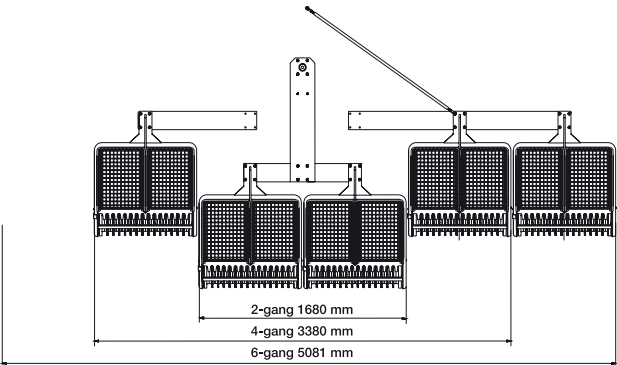

Using the same technology as our larger pickers, the Manual Picker allows for easy and effective picking of smaller practice areas. It can also be used in confined areas when wet conditions make motorized picking unwise.

MULTIFLEX DISCS

PDM 0052	2 gang	Multiflex	4 baskets
PDM 0000	3 gang	Multiflex	6 baskets
PDM 0082	4 gang	Multiflex	8 baskets
PDM 0085	5 gang	Multiflex	10 baskets
PDM 0086	6 gang	Multiflex	12 baskets

PLASTIC DISCS

PEM 0001	Manual Picker	Plastic	1 basket
310 035	Manual Picker	Plastic	2 baskets

Ball Picker Heavy Duty

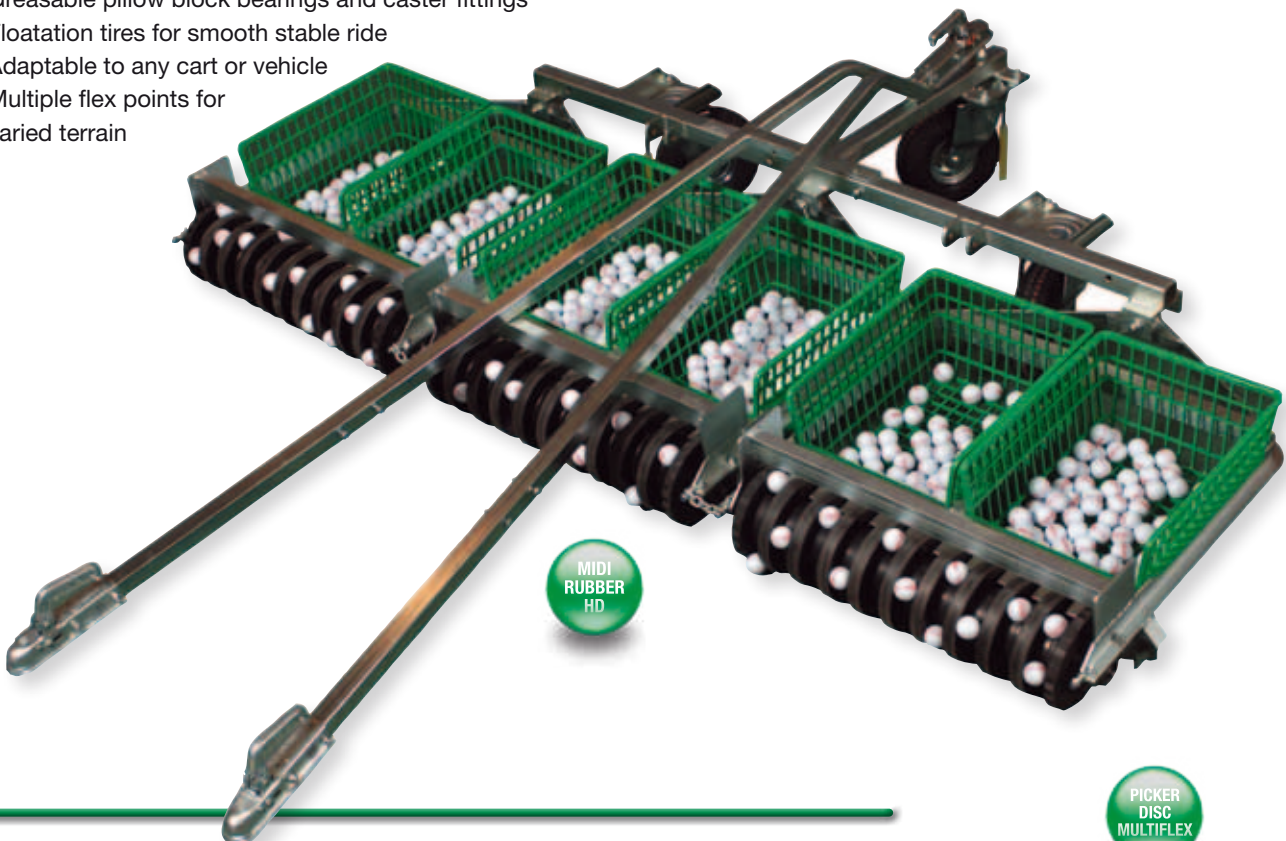

Range Servant Heavy Duty pickers are the only pickers truly designed to handle the exploitation at busy stand-alone driving ranges. Since our HD pickers are built to last with thick galvanized steel, they can manage heavy usage as well as rough climates and extreme weather conditions. Our pickers have the highest capacities available in the market today.

- Fully galvanised high grade steel
- In-line design allows for backing
- High capacities – 2 400, 4 000, 5 600 balls
- Greasable pillow block bearings and caster fittings
- Floatation tires for smooth stable ride
- Adaptable to any cart or vehicle
- Multiple flex points for varied terrain

Each gang has two 400 ball baskets for maximum picking capacity. Its straight beam design provides the cleanest sweep in the industry during both straight runs and turns.

IT'S IN THE DISC!

RS Multiflex discs are made of highly resilient soft plastic. The unique design protected discs are both flexible and durable and can absorb daily punishment while picking golf balls under even the most extreme conditions. They are UV protected for maximum wear.

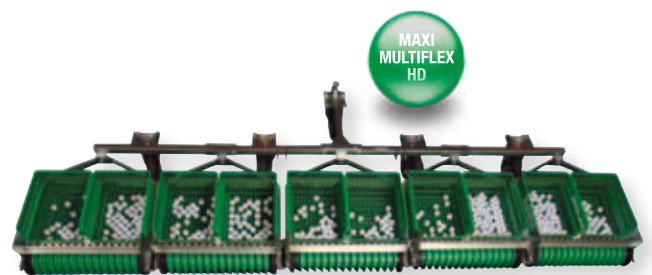

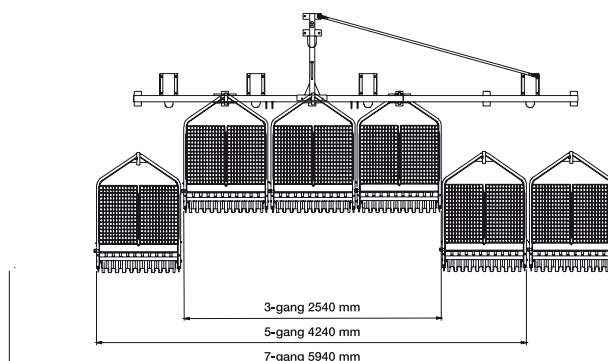

MULTIFLEX DISCS

310 005	MIDI	3 gang	6 baskets	2 400 capacity
310 015	MAXI	5 gang	10 baskets	4 000 capacity
310 025	JUMBO	7 gang	14 baskets	5 600 capacity

RUBBER DISCS

300 000	MIDI	3 gang	6 baskets	2 400 capacity
300 010	MAXI	5 gang	10 baskets	4 000 capacity

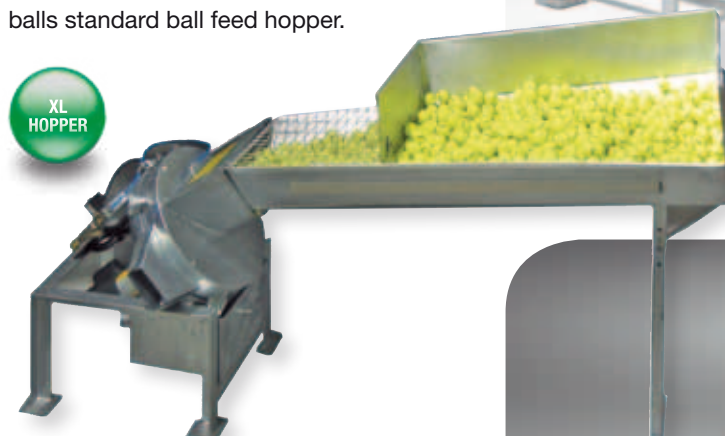

Modular in design, the picker can be upgraded to a larger model with a simple extension kit.

Ball Washer

BT-Series

Range Servant BT Ball Washers are famous worldwide for being one of the most reliable washers in the market. Manufactured with hot-dip galvanizing iron base frame, the BT washer is equipped with a powerful drive motor and only one moving part. Without any failure-prone couplings and belts the yearly maintenance is reduced to one procedure, changing the brush. Patent pending.

Range Servant BT Ball Washers take a ball-friendly approach by using fresh water pre-spray and concentrated jet-rinse to ensure clean range balls without the unnecessary use of detergents. The Range Servant BT Ball Washer comes with an 800 balls standard ball feed hopper.

- Jam proof!
- No track system
- Fresh water pre-spray and rinse
- Powerful drive motors
- Fully galvanized
- 100% of brush used
- Direct drive design

BT-1950

The BT-1950 is intended for high volume ranges with a washing capacity of 26 000 balls per hour.

BT-1300

The Range Servant BT-1300 is aimed for medium size ranges with a washing capacity of 14 000 balls per hour.

Both BT Washers can work as a stand alone unit, be fed by the Soaker 4000 or be a part of a Ball Management System. If extra capacity is required a 3 000 capacity XL-Hopper is available.

BALL WASHERS AND PRE-SOAKER

WGM 0000	Ball Washer BT-1300	14 000 balls/h
220 000	Ball Washer BT-1950	26 000 balls/h
221 400	XL-Hopper	3 000 balls
WIM 0002	Soaker 4000	4 000 balls
WIM 0060	Soaker Loading Tray	

Elevator

The RS Elevator is available in four standard lengths and can also be customized. Carrying 30 000 balls every hour, the RS Elevator can be seen at the busiest ranges all over the world.

It is constructed of rust-proof aluminum and stainless steel. With no failure prone bearings or couplings maintenance is negligible. All standard elevators comes with an automatic overfill protection system.

- 500+ balls per minute
- Aluminum and stainless construction
- Direct Drive Motor
- Custom built on request
- Automatic Overfill Protection

ELEVATOR WITH OVERFILL PROTECTOR

EGM 0001 Elevator 1.4 m (For RS Ultima 8)

410 000 Elevator 1.8 m (For RS 8/11 and flat hopper)

EHM 0001 Elevator 2.1 m (For all ball dispensers with cone top)

420 000 Elevator 2.3 m (For all hoppers with cone top)

ELEVATOR

Pre-Soaker

After years of development we are proud to introduce the Soaker 4000. Designed with mud season in mind, our pre-soaker loosens deeply embedded and caked-on dirt before the balls are lifted by the elevator into the BT-1950 or BT-1300 ball washer.

- Rust proof stainless and aluminum elevator for years of rust-free functionality
- Perforated belt design keeps water in the bin and the balls on the belt
- Speed control belt drive adjustable to feed any ball washer
- Removable interior grid system allows for easy maintenance and cleaning
- Durable Polymer, 4 000 ball capacity bin

NEW PAYMENT SOLUTION WITH TOUCH SCREEN

- ✓ **VISA / MASTERCARD WITH MEMBERSHIP TOP UP FACILITY**
- ✓ **BARCODE**
- ✓ **THE MIFARE® CONTACTLESS RFID PAYMENT SYSTEM**

NEW PAYMENT METHODS WITH MULTIPLE OPPORTUNITIES!

Range Servant has developed a completely new system of payment, where you can choose from three payment methods; barcode, Mifare® contactless RFID and VISA/Mastercard. The payment methods are visible on a 19" touch screen displayed right at the ball dispenser.

The touch screen creates many advantages and benefits not only to the user, but also the Golf Courses and their sponsors. Streaming video and sound can be shown at pre-programmed intervals, which offer a wealth of information for the players and more importantly, the possibility to earn extra income and a faster return on investment through sponsorship advertising. With the new stand-alone functionality the ball dispenser can operate without external connectivity. The large touch screen and the large icons visually displayed on the screen, makes the system very easy to use even for the least technical of users. Visual status reports show the condition of the ball dispenser and automatically alerts when a fault occurs.

VISA/MASTERCARD

The Visa/Mastercard solution is a direct response to customer requests and offers several great advantages. With the very

latest Chip and PIN technology we can offer the greatest possible security. The robust construction is applicable for outdoor use. We have applied the very latest Visa/Mastercard approved encryption. With this solution the transaction processing is immediate and it offers a membership top-up facility.

BARCODE PAYMENT

The new barcode payment system replaces the old pin number system. This familiar concept of the barcode offers many advantages, such as no code entering is required. Since there is no keypad with moving parts, less can go wrong. Another advantage is that the ticket can be configured for any number of balls.

THE MIFARE® CONTACTLESS RFID PAYMENT SYSTEM

The most widely used RFID technology in the world is now the standard for Range Servant Select Control System users! The Mifare® contactless RFID payment system offers a wide range of advantages. The cards are unique and cannot be copied. With contactless technology it can operate in any environment. This payment system offers countless design options including key rings, wrist bands, cards and tokens.

Welcome to Range Servant

Select Lite System with Touch Screen

NEW PAYMENT SOLUTION FOR EXISTING RANGE SERVANT BALL DISPENSERS

- ✓ **BARCODE**
- ✓ **THE MIFARE® CONTACTLESS RFID PAYMENT SYSTEM**

LATEST TOUCH SCREEN TECHNOLOGY

Upgrade your existing RS and Ultima ball dispensers right now with Range Servant's latest touch screen technology. Customers love our Lite daylight readable touch screen with extra large icons on an 8.4" touch screen. For operators, the Select Lite package comes with the Remote Service package, the Select software, visual status reports on the condition of the dispenser, different languages, a vandal-proof touch screen and a token mechanism to ensure 24/7 functionality.

BARCODE PAYMENT AND CARD READING SYSTEM

Installing Select Lite means your ball dispenser will have the new Range Servant Barcode Payment and card

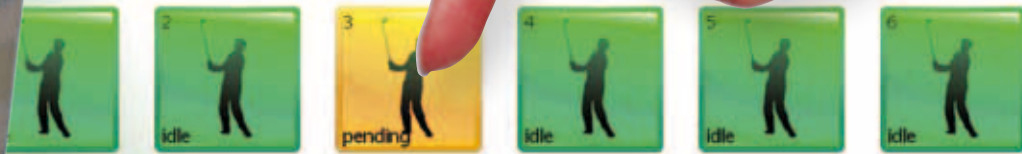

reading system, so there's no need for reading small code on the receipts, no need for customers to punch in codes, and no risk of their getting the code wrong! No keypad means no moving parts, so you get great reliability. The receipts can be configured for any number of balls.

THE MIFARE® CONTACTLESS RFID SYSTEM

Select Lite also comes with the market-leading Mifare proximity card reader, and that means you can set up customer loyalty programmes using unique proximity cards that can't be copied, and which can function in any environment. And proximity cards are far more reliable than token or Digicards!

Tee-Up Select Bay® System

NEW SOLUTION TO CHECK-IN AND RESERVE YOUR TEE-UP!

**THE NEW RANGE SERVANT TEE-UP SOLUTION
COMES WITH A SELECT.BAY® SYSTEM**

NEW RANGE SERVANT TEE-UP SOLUTION

The new Range Servant Tee-Up Solution comes with a Select.bay® system. The Select.bay® system is an innovative system designed and developed with the end user in mind. It gives control to the member and liberates your staffs' valuable time. Your range can work more or less independently!

THE SELECT.BAY® SYSTEM

The Select.bay® system is visible on a touch screen right at the ball dispenser or another central point of your choice. On the screen your customers can use their membership card to select one of six preferred bays from a central point. The system shows your members which bays are active and allows them to reserve a bay and provides them with an individual start time. At the bay, your member simply inserts their membership card and personalised information will be displayed right there on an integrated display panel in the bay. The player can then start to practice!

This system solution gives you a competitive range and the highly visible touch screen creates many advantages not only to the user, but also for you as a Club owner and your possible sponsors. Streaming video and sound can be shown at pre-programmed intervals, which offer a wealth of information for the players and more importantly, the possibility to earn extra income and a faster return on investment through sponsorship advertising. With this system you can obtain effective range management, as the golf members spend less time waiting for a free space as well as teeing up golf balls. This gives you as a range owner a faster turnover at each bay. The golf players also get a better training quality as they simply can focus on practicing rather than teeing up golf balls.

By choosing the Select.bay® system you can offer players the most effective golf training platform available.

Payment Systems

The Range Servant ball dispensers can be equipped with various types of payment systems:

TOUCH SCREEN – NEW 2009!

Range Servant has developed a completely new system of payment, where you can choose from three payment methods; barcode, Mifare® contactless RFID and VISA/Mastercard. The payment methods are visible on a 19" touch screen displayed right at the ball dispenser.

BARCODE PAYMENT

The new barcode payment system replaces the old pin number system. This familiar concept of the barcode offers many advantages, such as no code entering is required. The ticket can be configured for any number of balls.

MIFARE® RFID PAYMENT

The most widely used RFID technology in the world is now the standard for Range Servant Select Control System users! The Mifare® cards are unique and cannot be copied. With contactless technology it can operate in any environment. This payment system offers countless design options including key rings, wrist bands, cards and tokens.

CREDIT CARD PAYMENT

The Visa/Mastercard solution is a direct response to customer requests and offers several great advantages. With the very latest Chip and PIN technology we can offer the greatest possible security. The robust construction is applicable for outdoor use. With this solution the transaction processing is immediate and it offers a membership top-up facility.

TOKENS

Range Servant has a large selection of tokens for use in mechanical and electronic token acceptors. The tokens are nickelplated but also available in brass. Tokens are supplied in box of 500 tokens. All tokens are manufactured by Range Servant.

COINS

Up to six different coins can be used with the electronic coin acceptor. A simple mechanical coin acceptor is also available designed to accept one specific coin or token.

BILL ACCEPTORS

Range Servant can offer a highly reliable bill acceptor, which allow up to four different bank notes. The bill acceptor admits the bills in all four directions making it easy for the customer to insert the bills.

DIGICARDS

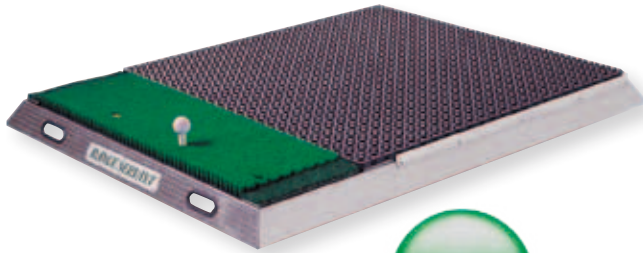

This card system uses magnetic encoded paper cards with up to 20 credits. The cards are marked after each use and scraped after all credits have been used. The cards can be customized with logos or other relevant information.

E-RANGE

e-range is a highly reliable chip-based debit key system that offers up to three individual basket sizes. The e-range system comes with a reader for the ball dispenser and a computer reload software. The e-keys come in a variety of colours.

Range and Course Accessories

TEE DIVIDER

MESH OTA0079, NYLON OTA0080

Tubular steel construction coated with green plastic or nylon cloth. Steel with mesh or nylon. Size: 1500L x 350H x 705H mm. Bag Stand is optional and easily installed.

PYRAMID BALL STACKER

OTA0069-OTA0072

Add quality appearance to your driving range! Just place the Pyramid filler over a Pyramid metal tray and pour. You will have a perfectly formed pyramid in seconds! For 91 or 140 balls.

ALUMINIUM BALL SHAG

OTA0073-OTA0074

Easy ball pick-up without bending over! The ball bag is constructed of durable nylon with a heavy-duty zipper and strong ABS plastic handle. Holds up to 75 balls.

STEEL SPIKE LITTER BASKET

OTA0082

Stainless steel mesh. Promotes air circulation to reduce odour. Height 450 mm.

CRANK BALL WASHER

OTA0065-OTA0068

Powder-coated green aluminium construction.

CRANK BALL WASHER HEAD

OTA 0065

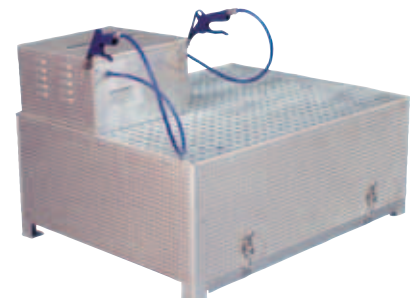

Powder-coated green aluminium construction.

SHOE BRUSH

900 100

Long lasting, replaceable nylon brushes in a sturdy metal frame.

AIR PRESSURE SHOE CLEANER

ONM 000

Two nozzles powered by a compressor. Front lid for easy cleaning.

Find your way!

MAINTENANCE-FREE PRODUCTS FOR THE GOLF COURSE

1. TEE-SIGNS

Tee-signs are manufactured per your requirements. The construction is sturdy and durable and easy to maintain. Old signs are exchanged with new signs in seconds. Lacquered ball and plastic lid available as options.

2. INFORMATION BOARD

Signboard for distinct information on starting times, slope etc. The size 1107x1138 mm, accommodates three A3 in width and two A3 in height. There are also smaller information boards for A4 or A3 sizes. Both pole and wall mount options are available. The show-case is locked by key and made of celar anodized aluminium with front glass of UV-resistant polycarbonate.

3. SEATING

A maintenance-free golf seat that doesn't require storing after the end of the season – it can be left outside throughout the year! The seat and back are made of aluminium sections with wood appearance and can easily be assembled with other products. A wall mount option is a simple, practical and space efficient solution.

4. CLOCK COLUMN

Illuminated clock controlled by timer signal = always the right time. Logotype or advertising slogan can be added and 360 degree seating option is available.

5. COMBINE THE PRODUCTS

Signs, seats, litter bins etc can be combined and assembled based on your requirements. All products are made in sturdy and durable constructions that are easy to maintain. Mounting is simple with pre-fabricated plinths or concrete slab.

SAVING TENDING WORK

Mounting on concrete slabs can result in considerable time savings for the green keepers, as trimming of the green around the poles and seats is not required. Just drive around the slab with the lawn mower!

THE TEE-SIGNS, INFORMATION BOARDS AND CLOCK HAVE SPACE FOR ADVERTISING.

Driving Range Shelters

6. DRIVING RANGE SHELTER

A driving range shelter eliminates cancelled golf days, ensuring more practice and profits. This bright and spacious weather-proof area provides a great setting for instruction. The stands are made of powder-coated aluminum sections and the roof is UV-resistant polycarbonate sheets. Walls are made of safety glass and there are options of tinted glass, lighting, seating, and other accessories. The shelter can in a discreet but nevertheless pleasant way contribute to the clubs' finances by carrying sponsor advertising signs.

7. SAFETY NETS

The net is made of powder-coated expanded metal. A modular system makes it easy to assemble per your sites' layout requirements. Options for attaching seating and accessories are available.

8. FENCE WITH CHAINS

Delimitations with poles and hot dipped galvanized chains offer a simple, sturdy and easy to mount fence.

For more products and further information see our separate catalogue for Maintenance-free golf course products or visit our website www.rangeservant.com

RODA GOLF & BEACH RESORT

Roda Golf & Beach Resort recently purchased two Ultima 8 ball dispensers complete with the Select Online Payment System, installed at their state of the art PGA Golf Academy in Murcia, Spain. Pablo Riestra, Director of Golf, required a system that provided complete flexibility and accountability plus adding value and increasing revenue. He stated that "Range Servant products are known for their superior quality and they provide the best equipment in the golf range industry".

ADLINGTON GOLF CENTRE

"We chose Range Servant as they were able to provide us with a complete family of ball management equipment from ball picker all the way through to their fully EPOS integrated Select ball sales and management solution and new auto tee up units"

David Moss
Director – Adlington Golf Centre UK

PGA OFFICIAL SUPPLIER

"We are delighted to announce that Range Servant have joined our Official Supplier Programme. Range Servant has vast expertise and knowledge in golf academies' development and we look forward to working together on developing PGA academies around the world."

Robert Maxfield
Property & Commercial Director PGA

Business, golf & leisure in one resort.

THE BELFRY

Range Servant is proud to be associated with De Vere The Belfry, home of the PGA National Golf Academy and host venue to the Ryder Cup Matches for an unprecedented four times. The PGA chose Range Servant to use at their National Golf Academy because Range Servant offers the very latest technology in Ball Management equipment to satisfy the high standard expected by our staff and customers.
